Philosophy is taken to be an abstract study about the fundamental structure of the world. It works towards foundations of each and every subject that is investigating the nature of the world but it does not only deal with foundations of science but with foundations of humanities as well, including that of social structures. The scope of philosophy is therefore vast. Philosophy inculcates the habits of logical reasoning, avoiding fallacious reasoning, thinking more carefully about the place of each and every aspect of nature vis a vis the whole of nature. A philosophy student emerges as a critical thinker who accepts nothing at face value. The philosophy student will contribute to society through positive reflection about its various facets. In pursuing these aims, B.A. (Hons.) Philosophy programme aims at developing the ability to think critically, logically and analytically and hence use Philosophical reasoning in practical situations. Pursuing a degree in philosophy will make students pursue interesting careers in media, education, law, politics, government etc.

Students who choose B.A. (Hons.) Philosophy programme, develop the ability to think critically, logically and analytically and hence use philosophical reasoning to develop sophisticated theories and also in everyday life. BA (Hons) Philosophy consists of Core Courses and Electives and also Discipline Specific Courses. A student qualifying in the subject will have broad knowledge of Indian philosophy and western philosophy; the student will know specific details of the theories of analytic and continental philosophy; the student will develop highly specific skills in logic, ethics, metaphysics, epistemology as a whole.

Programme Learning Outcomes in B A (Hons.) Philosophy

The completion of the B. A. (Hons.) Philosophy programme will enable a student to:

- i) Understand the broad ideas that are enshrined in the basic thinking of various centres of philosophy.
- ii) Develop the idea of creating new theories of metaphysics and epistemology and ethics and logic and aesthetics.
- iii) Critically analyse the hypothesis, theories, techniques, and definitions offered by philosophers.
- iv) Utilize philosophy to understand social realities and problems and come up with ideal solutions to them.
- v) Identify how deeply philosophy is connected to other disciplines like economics and natural sciences and literature.
- vi) Understand and appreciate the foundational nature of philosophy.
